

***RELATIONSHIP BETWEEN THE BIG FIVE PERSONALITY WITH
BULLYING BEHAVIOR (TRADITIONAL BULLYING AND
CYBERBULLYING)***

Abstract

The study aims to determine the relationship of big five personality with bullying behavior in two types, namely traditional bullying and cyberbullying. This research is a quantitative and sampling techniques stratified random sampling. The samples used were 100 junior high school students Darul Muttaqien South Jakarta. Analysis of data using product moment correlation analysis. The result of correlation pearson represents: first, the correlation between big five personality correlated positively with traditional bullying ($r=0,953$). Second, the correlation between big five personality correlated positively with cyberbullying ($r=0,562$)

Keywords:

Big five personality, bullying, traditional bullying, cyberbullying

HUBUNGAN ANTARA BIG FIVE PERSONALITY DENGAN PERILAKU BULLYING (TRADISIONAL BULLYING DAN CYBERBULLYING)

Abstrak

Penelitian bertujuan untuk mengetahui hubungan *big five personality* dengan perilaku *bullying* dengan dua tipe, yaitu *tradisional bullying* dan *cyberbullying*. Penelitian ini merupakan penelitian kuantitatif dan teknik pengambilan sampel *stratified random sampling*. Sampel yang digunakan sebanyak 100 siswa SMP Darul Muttaqien Jakarta Selatan. Analisis data menggunakan analisis korelasi product moment. Dari hasil uji korelasi pearson didapatkan : pertama, hubungan antara *big five personality* berkorelasi positif dengan tradisional *bullying* ($r=0,953$). Kedua, *big five personality* berkorelasi positif dengan perilaku *cyberbullying* ($r=0,562$).

Kata kunci:

Big five personality, bullying, tradisional bullying, cyberbullying
