

ABSTRACT

Currently a variety of all of the outstanding musical biography in stores famous book in Jakarta, but most of the book that contains the content and layout contains pages that are not much different from each other, judging from the popularity era figures and raised nearly all the content contains her book is dominated by black and white photos only, based on that I, as the designer wanted to make this book a biography with a visual display that is much different from what has been circulating in the market, by converting an existing black and white photo into a digital illustration (vector), it is believed to avoid boredom when the reader when reading the book as well as provide new colors and styles in the visual appearance of a biography of music that many in the market have now this.

In each of the content of the book will be a popular color and properties used in 50'an era it was done as it relates to the themes raised in order to support the atmosphere you want created. It is hoped that the ideas and realized through the print media can be useful and interesting enthusiastic reader to read the book, other than the authors also make the media - media that will support other media can be used as a complement to the mainstream media and can be used as a souvenir for the readers.
