

## **ABSTRACT**

*The purpose of this study is to analyse the influence of leadership on job satisfaction among a purposive sample of 30 employees of PT Indotrade Pratama Konsultan branch Jakarta.*

*The primary data was obtained from questionnaires, while the secondary data were obtained by literatures and websites. Method data analysis used are linear regression analysis, using IBM SPSS version 21 program.*

*Results of hypothesis testing, shows that the variables: the Leadership has positive influence on job satisfaction. The result of the small value of the coefficient of determination indicates that the ability of independent variables (leadership) in explaining the dependent variable (job satisfaction) is very limited.*

*Keywords: leadership, and job satisfaction.*
