

## ABSTRACT

The need for information quickly, precisely and accurately is a crucial aspect in any activity in one institution or agency. The importance of the role of information technology in the organization of resources is now increasingly felt, especially with increasing data, then manually processing these data will be increasingly difficult. In the CV. D'BESTO engaged in culinary is a fast growing company seiiring advanced culinary business. In the business process, especially on the supply and distribution experience problems and impeding business done everyday. As the distribution than the distribution of raw materials to various local branches. The process is still manual This distribution is less able to speed up the process of distributing materials that often occurs late in the process of distributing to the local branch and logistical supplies that are often hampered by the supply has not been coordinated with distribution and inventory reports are less accurate. In this paper the authors make the distribution system design and supply logistics cv. D'Besto aimed to simplify the whole process of distribution and supply of raw materials to the branch and reports as well as reports of the distribution of the revenue to the various branches, and help improve the performance of the company itself.
