

ABSTRACT

Bhakti Asih General Hospital is a Private Hospital located on Jl. Raden Saleh 10, Karangtengah, Ciledug, Tangerang Starting From Practice midwives Ny.Dedeh Nuriyati In 1980, and continues to be developed Maternity Hospitals In 1985, the clinic tahun1993 continue to be developed through the clinic that is equipped with a Specialist clinic, Year 2005 in the developed again into general hospitals in Tunjang complete equipment and the inauguration of the hospital, the development of hospitals continue to be made until this time, has now become a public hospital B.Di class Ciledug that more and more patients who went to the general Hospital Bhakti Asih, the service, efficiency, and effectiveness in providing services to the satisfaction of the patient must also be improved. Development of Bhakti Asih General Hospital serving patients in both outpatients and inpatients were good enough, but there are still weaknesses and deficiencies that occur in the current system ini. Metode development of the system used by the authors is the need for inpatient menganalisis and **circulation services to hospitals and inpatient rooms for development**, so it can receive all the patients who go to the hospital without any rejection bhakti compassion for hospitalization.

Keywords: **circulation services to hospitals and inpatient rooms for development.**
