

Abstract

Illustrated book for children that provide entertainment fascinating reading because of the lack of entertainment media for children in Indonesia that provides readings that only emphasizes the entertainment side of it. Market dominated by books that tend to be educational and also makes the children feel bored quickly if it should continue to listen to the lesson. For that book illustration should be able to stimulate children's imagination through visuals are attractive and soft colors and suitable for children. The theme of fantasy for children remains a good tool to stimulate children's imaginations because it presents a story out of everyday life. Children to be free in thought and not overburdened with the education that teaches children about something, the child will feel more relaxed and enjoy reading. Allowing the child free to imagine and to express it better for letting the child is free to follow their own desires.

The imaging technique is also a variety of children's books, and collage techniques still have a good opportunity amid the many book illustrations using digital techniques. Therefore, the authors make a media form of book illustration books that use collage techniques. It is expected that this media children can get an attractive alternative entertainment. Moreover, the authors also make the media - other supporting media that can later be used in addition to media and expression for children.

Keywords : fantasy, collage, children.
