

Abstract

Today, Futsal into something familiar sound in the ears. Many people today play a sport that is a branch of this football. Futsal teams sprang up in various parts of the country in the world, so that now finally has its own place in futsal fans.

But ironically, many errors that occur in the community of fans of this sport. May be due to lack of information and the explanations are clear and accurate information on futsal itself. For example, futsal field size much less meet the standards of the field itself. So is the material of the field, most of them use artificial grass. Although allowed, but do not meet the prerequisites of the feasibility of futsal field.

Thus the author would like to create an interactive digital media content to inform and explain about futsal which is expected later people will see it to understand more about how the real futsal.
