ABSTRACT**

*2007 economic conditions in general are at a pressure of economic crisis in property sector that occurred in United State and soaring world oil reached U.S \$ 100 a barrel and a slow down in world economic growth. Trend of economic decline will be felt in Indonesia raised fuel prices by around 28.5% which will certainly affect the price continuously.*

*The data used in this study are secondary data that has been processed. Sample taken using a sample selection technique with particular consideration (purposive sampling).*

*This study uses simple regression analysis method, revenue sharing mudharabah as the dependent variable and inflation as the independent variable. Result of research conducted on the regression analysis was 4.8% inflation variables are not influential to the revenue sharing significance Mudharabah. No significant effect of inflation on financing Mudharabah Revenue Sharing.*

*Keywords : Inflation, Revenue Sharing Mudharabah*
