ABSTRACT

In conducting this research the author has a purpose which is to determine the effect on the growth of margin murabahah financing in PT Bank Muamalat Indonesia, Tbk.

This research used causal research methods. Samples used in this study are quarterly financial reports from 2003 until 2010. The independent variable (independent variable) in this research is a margin was given the symbol X. Related variables (dependent variable) in this study is that given a symbol Murabahah financing Y.

The result of this research is based on simple linear regression analysis there is R^2 of 50.5% so in this case the results have an impact on the growth of 50.5% murabahah financing, while 49.5% is explained by factors - other factors had not been examined. T test showed that the margin significantly influence the growth of financing murabahah.

Keywords: Margin, Murabahah Financing
