

ANHAR

STEPPED ARE SURE TO FUTURE

The authors here make the website "e-learningUMB", e-learningUMB is the submission of subject matter Mercur Buana University through two media of video and animation, so I made a website design tailored to the wishes of students.

The purpose of the writer to make website "e-learningUMB" create an interactive e-learning and effective. That is to deliver lecture material in a different way through the video and animation, it is intended that students learn when using e-learning is not tired or bored, then made a delivery of material that is different.

To create a website "e-learningUMB" writers do multiple searches starting from the collection of data and multimedia to analyze the data as supporting the concept of designing compliance Web site "e-learningUMB". Therefore, in order to meet graduation requirements for undergraduate majors-1 strata graphic design and multimedia. authors create e-learning includes videos and animations and display design tailored to the user or student.

Hope this e-learning is not saturated at the time students learn to use e-learning. And then be used in conveying the subject material
