KATA PENGANTAR

Puji syukur Alhamdulillah kehadiran Allah SWT yang telah melimpahkan segala rahmat dan karuniaNya, sehingga penulis dapat menyelesaikan laporan tugas akhir yang merupakan salah satu persyaratan untuk menyelesaikan program studi strata satu (S1) pada Jurusan Teknik Informatika Universitas Mercu Buana.

Penulis menyadari bahwa laporan tugas akhir ini masih jauh dari sempurna. Karena itu, kritik dan saran akan senantiasa penulis terima dengan senang hati.

Dengan segala keterbatasan, penulis menyadari pula bahwa laporan tugas akhir ini takkan terwujud tanpa bantuan, bimbingan, dan dorongan dari berbagai pihak. Untuk itu, dengan segala kerendahan hati, penulis menyampaikan ucapan terima kasih kepada:

1. Bapak Rapelino Ferdiansyah, ST, M.Kom selaku pembimbing tugas akhir pada Jurusan Teknik Informatika Universitas Mercu Buana.
2. Ibu Ida Nurhaida, ST, MT selaku koordinator tugas akhir pada Jurusan Teknik Informatika.
3. Ibu Devi Fitriana, Skom. MTI selaku KapProdi Teknik Informatika.
4. Isteriku tercinta yang selalu terus menerus memberikan spirit maupun pengertian dan kebijakan untuk menyelesaikan tugas akhir ini.
5. Anak-anakku tercinta yang telah memberikan pengorbanannya dalam memberikan waktu, semangat dan pengertiannya.

Semoga Allah SWT membalas kebaikan dan selalu mencurahkan hidayah serta taufikNya, Amin.

Jakarta, Maret 2011

Penulis

ABSTRACT

In order to carry out functions as a supporting business activities and operations in PT.ABC, then the general section (GS), running multiple job functions, one of them is to manage and supervise the use of stationery. In the exercise of supervision on the use of stationery is generally involve the staff of other divisions, named the secretary. Regarding the case of the secretary is due to all the needs of its staff to support business activities and operations examined by the secretary, one of which is to serve the demand for office stationery needs. Every secretary of the handle 2 to 4 divisions. Monitoring or supervision regarding the use of stationery is needed so that all expenses have been issued can be controlled very well and can quickly be accounted for, not only up there, the information can be used for planning costs well. . Based on the observations show that supervision can not be employed optimally. This is because the required information is not easily available, although it can, the information was too late.

therefore, to help ease the task,speed up and simplify the management of the use of stationery.

Designed a system monitoring application usage of stationery.(ATK) research method used is the method of software engineering waterfall model.

This research will produce an information system application that is easy, fast and accurate, so as to assist the company in managing and supervising the use of finestationery.

Design and implementation is limited to one process module, namely the presentation of information on the use of stationery.during the final stage of software development conducted an evaluation of process and information produced software.what things that have and have not done on this software development will be reviewed the last part of this essay.

Keywords : control system applications the use of stationery, software engineering, PHP, MySQL

ABSTRAK

Untuk dapat melaksanakan fungsi sebagai pendukung kegiatan bisnis dan operasional di PT.ABC, maka bagian umum (GS) menjalankan beberapa fungsi pekerjaan, satu diantaranya adalah mengelola dan mengawasi penggunaan alat tulis kantor. Dalam pelaksanaan pengawasan terhadap penggunaan alat tulis kantor ini bagian umum melibatkan staff divisi lain, yaitu para sekretaris. Mengenai hal keterlibatan sekretaris ini lebih disebabkan karena seluruh kebutuhan para staff untuk menunjang kegiatan bisnis dan operasionalnya di layani oleh sekretaris, salah satunya adalah melayani permintaan kebutuhan alat tulis kantor. Setiap sekretaris menangani 2 sampai 4 divisi. *Monitoring* atau pengawasan mengenai penggunaan alat tulis kantor sangat perlu dilakukan agar semua biaya yang sudah dikeluarkan dapat terkendali dengan baik dan dapat cepat dipertanggung jawabkan, tidak hanya sampai disitu, informasinya dapat digunakan untuk membuat perencanaan biaya dengan baik. . Berdasarkan pengamatan menunjukan bahwa pengawasan belum dapat dilakukan dengan optimal. Hal ini disebabkan karena informasi yang diperlukan tidak mudah didapat, meskipun bisa, informasinya pun sudah terlambat.

Oleh karena itu untuk membantu meringankan tugas, mempercepat dan mempermudah pengelolaan penggunaan alat tulis kantor, dirancanglah suatu aplikasi sistem monitoring pemakaian alat tulis kantor(ATK).

Metode penelitian yang digunakan adalah metode rekayasa perangkat lunak model Waterfall,

Penelitian ini akan menghasilkan suatu aplikasi sistem informasi yang mudah, cepat dan akurat, sehingga dapat membantu bagian umum dalam mengelola dan mengawasi penggunaan alat tulis kantor dengan baik.

Desain dan implementasi dibatasi pada salah satu modul proses, yaitu penyajian informasi penggunaan alat tulis kantor. Pada tahap akhir pengembangan perangkat lunak dilakukan evaluasi terhadap proses dan informasi yang dihasilkan perangkat lunak. Hal-hal apa yang telah dan belum dilakukan pada pengembangan perangkat lunak ini akan diulas pada bagian akhir skripsi ini.

Kata kunci: Aplikasi Sistem Monitoringl Penggunaan Alat Tulis Kantor, Rekayasa Perangkat Lunak, PHP, MySQL
