

ABSTRACT

Talking about the clothes actually talking about something very close to us. Now the fashion trend in Indonesia is growing very rapidly, although still affected by the international fashion without them know about the history of fashion.

After the public aware of the enthusiasm and interest in at least the desire people will find information about it. Community informed about the history of fashion and the latest trend in several ways, among others through the medium of television magazines, internet and others. Therefore, the authors offer a media that can help people to better know the history and not just by fashion trends through magazines or TV, but with the use of interactive multimedia is more interesting in use. Due to the use of interactive multimedia society that is able to interact directly with a computer using an interactive CD

A designer uses basic elements of a design in order to effectively deliver its objectives. The elements are used, among other letters, colors, images, cartoon models, photographs, animation, three dimensional, geometric shapes, textures, and humans. Interactive CD design process is using the software Adobe Flash CS4 Professional, Adobe Photoshop CS4, and Adobe Illustrator CS4. Interactive CD is contained within the knowledge of the history of the dresses and skirts as well as various examples of images of dresses and skirts.

The results of this design is expected to be a reference or benchmark in Interactive Multimedia Design conduct, both for the student, novice designers, educators, and others.
