“ AKSESIBILITAS “

ABSTRAK

Understanding of all functions of government law No. 4, 1997 (UU No. 4 Tahun 1997) on access for disabled people and government regulation No. 43/1998 (PP. No. 43/1998) concerning the development of social prosperity for the disabled is still low. For example, there is no rea in East Java which hasgovernment regulation (PERDA) about access for the disabled. At operational level, similarly, the implementation of the law is still far from expectation due to lack of awareness, lack of socialization, and lack of advise from each regional leader. Apart from that, the role of various social organizations in East Java is still very low.
