

**THE INFLUENCE OF NET INCOME AND OPERATING CASH FLOW IN
COMPANIES MANUFACTURING CONSUMER GOODS SECTOR PERIOD 2007-
2010**

By : Lili Komariah

Abstract

This study aims to analyze the influence of net income and operating cash flow in companies manufacturing consumer goods sector. Data obtained by 14 firms with the period from 2007 to 2010 and attributed to two variables of the study, namely: the independent variables: net income and operating cash flow and dependent variables: the stock price. Data analysis methods used are the normality test data, the correlation coefficient and the coefficient of determination, simple linear regression, descriptive statistics, t test, one way annova test.

The results showed that: 1) Simultaneously there is a positive influence on net income and operating cash flow to share price. 2) Partially have a positive impact net income and operating cash flow to share price.

Keywords: net income, operating cash flow, stock price.
