ABSTRACT

This study aims to determine the effect of asset structure variables, firm size and operating leverage on capital structure of the food and beverage companies listed on the Indonesia Stock Exchange (BEI).

With using purposive sampling method, adequate sample used is a total of 12 the food and beverage companies listed on the Indonesia Stock Exchange (BEI) in the period mentioned above. Analysis techniques used in this study is the multiple linear regression to obtain a comprehensive picture of the relationship between variables is the one with the other variables.

The results of this study showed variable asset structure, firm size and operating leverage effect on the capital structure. Other results indicate that the variable structure of assets and operating leverage has no effect on the capital structure. While the variable size firm of the partial effect on the company's capital structure.
