

GAMBARAN PERILAKU PASCA ABORSI PRANIKAH DEWASA AWAL

Dina Panca Setiyawati

ABSTRAK

Tujuan dari penelitian ini adalah memberikan gambaran perilaku pasca aborsi pranikah dewasa awal. Metode penelitian yang digunakan adalah metode kualitatif melalui wawancara dan observasi. Subyek dalam penelitian ini adalah dewasa awal rentang usia 20-21 tahun yang sudah melakukan aborsi pranikah. Hasil penelitian menunjukkan ketiga subyek sama-sama mengalami gangguan psikologis pasca aborsi, di antaranya adanya perasaan bersalah, bersedih terus-menerus, ketidakmampuan untuk memaafkan diri sendiri, mimpi buruk tentang bayi, mudah marah dan rasa rendah diri.

***DESCRIPTION OF THE BEHAVIOR OF POST-ABORTION PREMARITAL EARLY
ADULTHOOD***

ABSTRACT

Purpose of this study is to provide a description of the behavior of post-abortion premarital early adulthood. The research methods used are qualitative methods through interviews and observation. Subjects in this study were early adult age range 20-21 years who have had an abortion before marriage. Results showed all three subjects are both experiencing post-abortion psychological disorders, among them a sense of guilt, sorrow constantly, inability to forgive yourself, nightmares about the baby, irritability and low self-esteem.

Keyword : Conduct Post-Abortion, Early Adulthood.
