

## **ABSTRAKSI**

We should not live long on earth, the earth we live in old and very heavy burden due to human irresponsibility, perhaps even our own. Ecosystems are no longer balanced, the land is no longer providing the land to grow a lot of lives. Plastic waste is one material that can menumbulkan declining soil fertility and a lot depends on the soil ecosystem. If land can not be a source of fertility, the worst is the extinction of an ecosystem. Many Media has voiced, many media type is selected, and many who were not heard because they hear only through their ears. Let's listen to the heart. The mission of each environmental media publications. Not for those who create, not for the shelter sector in the institution. But we, and our grandchildren.

Keywords: Earth, Ecosystem, Media, Environment
