

ABSTRACT

This research aims to know the influence of growth rate , profitability, Institutional Ownership, size of the company to the Debt Policy (DER). The object of this study is a manufacturing company with the automotive sector and the components listed in the Indonesia Stock Exchange. This study used a sample of 12 companies with descriptive statistical approach. Therefore, the analysis of the data used is the statistical analysis of multiple regression test.

The results of this study indicate that the variable size of the company's growth and significant effect on the debt policy (DER) at the company's Automotive and Components. This is evidenced from the results of the F test and t test also demonstrates the significant value of two independent variables hypothesis. In addition, the results of this study also showed that the variables Profitability and Institutional Ownership no significant effect. This is evidenced from the results of t test that showed no significant values of the two independent variables hypothesis.

Keywords: Company Growth, Profitability, Institutional Ownership, Company Size, Debt Policy (DER), Automotive and Components Company.
