

ABSTRACT

SMA 1 BARUNAWATI School is one school that implements teacher performance appraisal to ensure a quality learning process for all students, If done manually requires a long time and is susceptible to errors in reports or recap assessment along with other data reports. This makes teacher performance judgments ineffective. Based on the problems that occur, the authors make information systems to be in data collection, search data, assessment process, and report generation. The research method is observation and interview, RAD (Rapid Application Development) method. The design of the system model using UML (Unified Modeling Language), use case diagrams, activity diagrams, sequence diagrams, and class diagrams. This system uses PHP MySQL programming language and MySQL database.

Keywords : performance of teachers , PHP MySQL , UML, school

ABSTRAK

Pelanggaran sering dilakukan oleh guru SMA Barunawati dalam melaksanakan tugasnya. Tidak hanya pelanggaran dalam proses pembelajaran, Hal ini sangat mengkhawatirkan perkembangan siswa. Pada kenyataannya mereka adalah harapan bangsa. Untuk menghilangkan tindakan tersebut diperlukan berbagai cara supaya pelanggaran semakin berkurang. Metode penelitian yang dilakukan adalah studi lapangan meliputi observasi dan wawancara,. Metode *RAD (Rapid Application Development)*). Perancangan model sistem menggunakan UML(*Unified Modeling Language*), meliputi diagram *use case*, diagram *activity*, diagram *sequence*, dan diagram *class*. Sistem ini menggunakan bahasa pemrograman PHP MySQL dan *database* MySQL

Kata kunci : Pelanggaran Guru, *PHP MySQL* , UML, sekolah
