BAB I : PENDAHULUAN

1.1 Latar Belakang ........................................................................................................ 1
1.2 Rumusan Masalah .................................................................................................. 2
1.3 Tujuan Penelitian .................................................................................................. 3
1.4 Batasan Penelitian ................................................................................................ 3
1.5 Metodologi Penelitian .......................................................................................... 4
1.6 Sistematika Penulisan ........................................................................................... 4
1.7 Daftar Pustaka ....................................................................................................... 6

BAB II : LANDASAN TEORI

2.1 Cahaya........................................................................................................................................7

2.1.1 Sifat-sifat Cahaya .................................................................................................................8

2.1.2 Difraksi Cahaya ....................................................................................................................13

2.1.3 Standar Pencahayaan ............................................................................................................14

2.1.4 Kecepatan Cahaya ................................................................................................................14

2.1.5 Cahaya Tampak .....................................................................................................................15

2.2 Pengertian Li-Fi .......................................................................................................................17

2.2.1 Cara Kerja Li-Fi ....................................................................................................................18

2.3 Model Inverse Square Law .....................................................................................................21

2.4 Teknologi WDM .....................................................................................................................22

2.5 Studi Literatur ..........................................................................................................................23

2.5.1 Literatur Pertama ................................................................................................................23

2.5.2 Literatur Kedua ....................................................................................................................25

BAB III : METODE PENELITIAN

3.1 Prinsip Kerja Sistem..................................................................................................................28

3.2 Metode Pengukuran ................................................................................................................32

3.2.1 Metode Pengukuran Walk Test ............................................................................................33

3.2.2 Metode Pengukuran Penghalang Berwarna .................................................................33

3.2.3 Metode Pengukuran dengan Penghalang Benda Padat................................................34
3.3 Flowchart Metode Pengukuran .................................................................36

BAB IV : PERANCANGAN DAN REALISASI FILTER

4.1 Pengukuran .................................................................................................38

4.2 Metode Pengukuran Walk Test .................................................................38
  4.2.1 Pengukuran LED 0° ........................................................................39
  4.2.2 Pengukuran LED 30° .......................................................................41
  4.2.3 Pengukuran LED 60° .......................................................................42
  4.2.4 Pengukuran LED 90° .......................................................................44

4.3 Metode Pengukuran Filter Warna .............................................................45

4.4 Metode Pengukuran Dengan Penghalang Kardus .................................47

BAB V : KESIMPULAN DAN SARAN

5.1 Kesimpulan .................................................................................................51

5.2 Saran ..........................................................................................................52
