### **ABSTRACT**

*Vandyke is an old alternative photographic print from the 18th century that was discovered by the English nobleman, Sir John Herschel. The Vandyke print technique is applied manually with 3 chemical liquids such as, ferric ammonium, tartaric acid, and silver nitrate. The name Vandyke itself is taken from the character of paintings of Belgian artists who are dark brown, Van Dyck.*

*In Indonesia, vandyke printing techniques developed at an Indonesian Art Institute, bachelor degree photography majors, Faculty of Art Media Record, Yogyakarta. They do a lot of print experiments in various materials, such as paper, cloth, wood, and iron. There is an old printing technique known as Old Print and Vandyke known as brown print.*

**Keyword:** Bag, Vandyke, Leather

# **PROSES CETAK VANDYKE PADA TAS KULIT UNTUK WANITA**

## **ABSTRAK**

Vandyke merupakan alternatif cetak fotografi tua dari abad ke 18 yang ditemukan oleh bangsawan asal Inggris yaitu, Sir John Herschel. Teknik cetak vandyke diterapkan secara manual dengan 3 cairan kimia seperti, ferric amonium, tartaric acid, dan silver nitrat. Nama vandyke itu sendiri diambil dari karakter lukisan seniman asal Belgia yang berwarna coklat pekat, Van Dyck.

Di Indonesia sendiri teknik cetak vandyke dikembangkan di sebuah Institut Seni Indonesia, jenjang S1 jurusan fotografi, Fakultas Seni Media Rekam, Yogyakarta. Mereka banyak melakukan berbagai eksperimen cetak di berbagai material, seperti kertas, kain, kayu, dan besi. Disana teknik cetak tua dikenal dengan sebutan *Old Print* dan vandyke dikenal dengan *brown print*.

**Kata kunci:** *Tas, Vandyke, Kulit*
