**Bab I. Pendahuluan**

1.1 Latar Belakang masalah ......................................................... 1
1.2 Perumusan masalah .................................................................... 4
1.3 Tujuan penelitian ..................................................................... 5
1.4 Batas penelitian ...................................................................... 5
1.5 Sistematika Penulis ................................................................. 5

**Bab II. Tinjauan Pustaka**

2.1 Konsep dan Teori

2.1.1 Pengertian pengendalian kualitas .......................................... 7
2.1.2 Pengertian kualitas ............................................................... 7
2.1.3 faktor – faktor pengendalian kualitas ..................................... 11
2.1.4 langkah – langkah pengendalian kualitas .................................. 11
2.1.5 Perkembangan pengendalian kualitas ....................................... 12
2.1.6 Peningkatan kualitas ............................................................. 14
2.1.7 *Quality control circle* ....................................................... 14
2.2 Penelitian Terdahulu .................................................................. 32

http://digilib.mercubuana.ac.id/
2.3. Kerangka Pemkiran ..............................................................................................................................34

Bab III. Metode Penelitian

3.1 Jenis dan sumber data ..............................................................................................................................36
3.2 Metode Pengumpulan data ..........................................................................................................................37
3.3 Pengolahan data dan Analisa Data .............................................................................................................37
   • Penyusunan Peta Kendali $p$ .......................................................................................................................38
   • Uji Kecukupan Data .....................................................................................................................................39
   • Menentukan Prioritas Perbaikan ..................................................................................................................40
3.3.1 Hasil dan Analisis Data ..........................................................................................................................40
   • Diagram Fishbone .......................................................................................................................................41
   • Langkah Perbaikan 5W+1H .......................................................................................................................41
3.4 Langkah – langkah Penelitian ....................................................................................................................41

Bab IV. Pengumpulan Dan Pengolahan Data

4.1 Pengumpulan Data
4.1.1 Observasi Lapangan .................................................................................................................................42
4.1.2 $Flow Proses Club Can 125 Gram$ ...........................................................................................................42
4.1.3 $Raw Material$ .........................................................................................................................................43
4.1.4 Bagian Cetak (Mesin Printing / Prino) .................................................................................................44
4.1.5 Mesin Slito (Mesin Potong) ....................................................................................................................50
4.1.6 Mesin Press ................................................................................................................................................52
4.1.7 Mesin Packing (pengemasan) ..................................................................................................................53
4.2 Pengolahan Data
4.2.1 Data Produksi Jumlah $Reject$ ................................................................................................................54
4.2.2 Jumlah $Reject$ Menurut Jenisnya ..........................................................................................................55
4.2.3 $Histogram Reject Club can$ menggunakan $Minitab$ ............................................................................56
4.2.4 Pengolahan Data Peta kendali $p$ .........................................................................................................57
4.2.5 Melakukan Uji Kecukupan ...........................................................................61
4.2.6 Diagram Pareto ............................................................................................61
4.2.7 Jenis – jenis Cacat Pada Produk .................................................................63

Bab V. Hasil Dan Pembahasan

5.1 Analisa Hasil Data ..........................................................................................64
5.2 Analisa Menggunakan Diagram Fishbone .....................................................65
  5.2.1 Analisis Fishbone Reject Screat ............................................................65
  5.2.2 Analisis Fishbone Reject Penyok ............................................................66
  5.2.3 Analisis Fishbone Reject Misprint ............................................................67
5.3 Analisa Usulan Tindakan Perbaikan dengan Metode 5W+1H .....................68

Bab VI. Kesimpulan Dan Saran

6.1 simpulan ...........................................................................................................73
6.2 Saran ................................................................................................................74
