ABSTRAKSI ................................................................................................................................. i
ABSTRACT ................................................................................................................................. ii
LEMBAR PERNYATAAN ......................................................................................................... iii
LEMBAR PERSTUJUAN SIDANG ............................................................................................ iv
LEMBAR PENGESAHAN SIDANG ............................................................................................ v
Daftar Isi ................................................................................................................................... vi
Daftar Gambar ....................................................................................................................... viii
Daftar Tabel .............................................................................................................................. ix

BAB 1. PENAHULUAN ............................................................................................... 1-1
1.1. Latar Belakang ........................................................................................................ 1-1
1.2. Rumusan Permasalahan ........................................................................................... 1-2
1.3. Tujuan & Manfaat Penelitian .................................................................................. 1-2
1.3.1 Tujuan Penelitian ........................................................................................... 1-2
1.3.2 Manfaat Penelitian ......................................................................................... 1-2
1.4. Ruang Lingkup & Batasan Penelitian ..................................................................... 1-2
1.5. Metodologi Penelitian ............................................................................................. 1-3
1.6. Sistematika Penulisan Laporan ............................................................................. 1-4
1.6.1 Pendahuluan ................................................................................................... 1-4
1.6.2 Landasan Teori .............................................................................................. 1-4
1.6.3 Analisis dan Perancangan Sistem ...................................................................... 1-4
1.6.4 Implementasi Dan Testing ................................................................................ 1-5
1.6.5 Penutup ........................................................................................................... 1-5

BAB 2. LANDASAN TEORI .......................................................................................... 2-6
2.1. Game Puzzle ............................................................................................................ 2-6
2.2. Android .................................................................................................................... 2-6
2.3. Algoritma Fisher-Yates Shuffle ............................................................................... 2-7
2.4. Studi Terkait ........................................................................................................ 2-8

BAB 3. ANALISA DAN PERANCANGAN SISTEM .................................................... 3-1
3.1. Concept .................................................................................................................. 3-1
3.2. Design .................................................................................................................... 3-1
3.2.1 Struktur Navigasi ........................................................................................... 3-1
3.2.2 Flowchart ........................................................................................................ 3-2
3.2.3 Perancangan Algoritma ..................................................................................... 3-4
3.2.4 Storyboard ...................................................................................................... 3-6
3.2.5 Pengenalan Karakter ..................................................................................... 3-9
3.3. Material Collecting .......................................................................................... 3-10

BAB 4. IMPLEMENTASI DAN PENGUJIAN ............................................................. 4-14

4.1. Assembly ........................................................................................................... 4-14

4.1.1 Perangkat Keras ........................................................................................... 4-14
4.1.2 Perangkat Lunak Platform ......................................................................... 4-14
4.1.3 Hasil Implementasi Aplikasi Game ............................................................ 4-15
4.1.4 Uji Coba ........................................................................................................ 4-19

BAB 5. KESIMPULAN DAN SARAN ....................................................................... 5-1

5.1. Kesimpulan ...................................................................................................... 5-1
5.2. Saran ................................................................................................................ 5-1
