

DAFTAR GAMBAR

1	Gambar 1.1 Manajemen Sumberdaya Air.....	I-1
2	Gambar 2.1 Peta Sumatera Selatan	II-1
3	Gambar 2.2 Kanal Buatan Pada Lahan Gambut.....	II-4
4	Gambar 2.3 Tempat Penampungan Air Gambut.....	II-4
5	Gambar 2.4 Lahan Industri Perkebunan Bibit Akasia.....	II-4
6	Gambar 2.5 Pengambilan Sample Air Gambut.....	II-4
7	Gambar 2.6 Flow Diagram Proses	II-14
8	Gambar 2.7 (1) Intake water, (2) Pompa intake, (3) Tangki kimia, (4) Clarifier tank, (5) Media filter Zeolite dan Carbon Filter, (6) Sistem Brackish Water Reverse Osmosis.....	II-15
9	Gambar 3.1 Distrik Nursery Air Sugihan, Kab. Ogan Komering Ilir, Palembang-Sumatera Selatan.....	III-2
10	Gambar 3.2 View Isometric Master Plan Sistem Pengolahan Air Gambut dengan Sistem BWRO (Brackish Water Reverse Osmosis).....	III-3
11	Gambar 3.3 Bagan Diagram Alir Proses.....	III-6
12	Gambar 4.1 (1) Raw Water/Intake Water, (2) Geo Membran.....	IV-1
13	Gambar 4.2 (1) Pompa Intake, (2) Flow Meter, (3) Water Level Control	IV-2
14	Gambar 4.3 (1) Tangki kimia pH Adjuster, Koaglan, Flokulan,	

	(2) Calcium Hypochlorite	IV-3
15	Gambar 4.4 Skema Aliran Flocculator Tank.....	IV-3
16	Gambar 4.5 Flocculator Tank.....	IV-4
17	Gambar 4.6 Kapur/Ca(OH) ₂	IV-4
18	Gambar 4.7 Grafik kenaikan pH air gambut pada variasi penambahan dosis larutan kapur 2%	IV-6
19	Gambar 4.8 (1) Kualitas air gambut, (2) Proses pencampuran kapur, (3) pH Controller	IV-6
20	Gambar 4.9 (1) Pompa Pengaturan pH, (2) Stroke Pengatur Dosis	IV-7
21	Gambar 4.10 Ilustrasi gambar (1) Sebelum penambahan koagulan, (2) Sesudah penambahan koagulan.....	IV-8
22	Gambar 4.11 (1) Sebelum penambahan koagulan,(2) Proses koagulasi, (3) Hasil proses koagulasi.....	IV-9
23	Gambar 4.12 Ilustrasi gambar (1) Proses Koagulasi, (2) Proses Flokulasi	IV-11
24	Gambar 4.13 (1) Hasil Proses Koagulasi,(2) Proses flokulasi, (3) Hasil proses flokulasi	IV-11
25	Gambar 4.14 Sedimentasi Clarifier Tank.....	IV-12
26	Gambar 4.15 Clarifier Tank	IV-13
27	Gambar 4.16 (1) Penyekat lumpur/lamella, (2) Tampak samping clarifier tank, (3) Tampak atas clarifier tank, (4) Hasil pengolahan proses sedimentasi, (5) Jarur drain pembuangan lumpur, (6) Proses pembuangan lumpur hasil	

	proses sedimentasi	IV-14
28	Gambar 4.17 (1) Pompa Filter, (2) Tangki karbon aktif	IV-15
29	Gambar 4.18 Sistem Pengolahan Air Gambut	IV-16
30	Gambar 4.19 Unit Brackish Water Reverse Osmosis	IV-16
31	Gambar 4.20 Tampilan awal Rosa (Reverse Osmosis System Analysis)	IV-17
32	Gambar 4.21 Mengisi tabel project information	IV-18
33	Gambar 4.22 Kolom pemilihan units setting.....	IV-19
34	Gambar 4.23 Kolom pemilihan temperature unit.....	IV-20
35	Gambar 4.24 Kolom feed water data.....	IV-20
36	Gambar 4.25 Kolom system configuration	IV-22
37	Gambar 4.26 Flow Calculator	IV-23
38	Gambar 4.27 Stage in pass	IV-24
39	Gambar 4.28 Stage in pass dengan jumlah 2 stage	IV-24
40	Gambar 4.29 Pressure vessels in each stage/Kebutuhan banyaknya pemakaian housing membrane.....	IV-25
41	Gambar 4.30 Elements in each vessel/kebutuhan banyaknya pemakaian filter membrane.....	IV-26
42	Gambar 4.31 Products Membrane Filter	IV-26
43	Gambar 4.32 Rekomendasi data products membrane filter	IV-27
44	Gambar 4.33 Dimensi dan volume tangki sedimentasi	IV-30
45	Gambar 4.34 Saluran Existing Inlet Pipa Intake Water	IV-34

46	Gambar 4.35 Saluran Existing Inlet Pipa Intake Water	IV-36
47	Gambar 4.36 Saluran Existing Outlet Pipa Intake Water.....	IV-39
48	Gambar 4.37 Saluran Existing Outlet Pipa Intake Water.....	IV-41
