

ABSTRACT

PT Bank DKI is a local government-owned enterprise engaged in banking. Diverse products available at Bank DKI include: deposits, loans and other financial services, such as interbank money transfers, local taxes etc. For credit products consist of mortgage loans (mortgage loans), Micro MSMEs, KMG (mortgage loans), Bank Guarantee, etc. Credit scoring analysis is conducted to assess whether or not a prospective debtor is entitled to get credit, mistakes in the analysis can adversely affect credit growth in a Bank, therefore there needs to be a consistent calculation in credit assessment analysis. Decision support system using exponential comparison method performed by *Relationship manager* (RM), can assist in the process of analysis so that the results obtained more accurate and consistent with the criteria and criteria value to be used as a credit rating standard.

Keywords: Decision support system, Exponential comparison method
