STATMENT SHEET	iii
APPROVAL SHEET	iv
VALIDATION SHEET	v
ACKNOWLEDGEMENT	vi
ABSTRACT	vii
TABLE OF CONTENTS	viii
LIST OF FIGURES	xi
LIST OF TABLES	xii
LIST OF EQUATIONS	xiv
CHAPTER 1 INTRODUCTION	1-1
1.1. Backgorund of Problem.....	1-1
1.2. Reaserch Question	1-2
1.3. Scope of Problem	1-2
1.4. Objective of Research.....	1-2
1.5. Benefits of Research.....	1-2
1.6. Methodology	1-3
1.7. Writing Systematic	1-3
CHAPTER 2 LITERATURE REVIEW	2-1
2.1. Classification.....	2-1
2.2. Credit	2-1
2.3. Data Mining.....	2-1
2.4. C4.5 Algorithms	2-3
2.5. Naive Bayes Algorithms.....	2-4
2.6. Weka.....	2-5
2.7. Performance Evaluation	2-6
2.8. Literature Review	2-7
CHAPTER 3 EXPERIMENT DESIGN	3-1
3.1. Dataset Explaination.....	3-1
3.1.1 Dataset Collection	3-1
3.1.2 Determining Atributtes	3-1
3.1.3 Grouping Data.....	3-2
3.2. Data Preprocessing	3-2

3.2.1	Data Cleaning.....	3-3
3.2.2	Data Transformation	3-3
3.3.	Experiment Scenario	3-3
3.4.	Process Data Mining	3-4
3.4.1	Mining Process using C4.5 Algorithm.....	3-4
3.4.2	Mining Process using Naive Bayes Algorithm	3-5
CHAPTER 4 RESULT AND DISCUSSION.....		4-1
4.1.	Analysis Research	4-1
4.2.	Analysis and Discussion.....	4-1
4.3.1.	Results Implementation of the Calculation Method of C4.5	4-1
4.3.1.1.	Calculations for Finding Root Node	4-2
4.3.1.2.	Calculation to find the internal node / nodes branch	4-6
4.3.1.3.	Determine the internal node for salary attribute with low value....	4-6
4.3.1.4.	Determine the internal node for salary attribute with low value and marital status with married value.....	4-9
4.3.1.5.	Determine the internal node for salary attribute with low value and marital statu with single value.....	4-11
4.3.1.6.	Determine the internal node for salary attribute with low value, marital status with single value and other installments with yes value.....	4-13
4.3.1.7.	Determine the internal node for salary attribute with low value and marital status attribute with single value and other installments attribute with no value.....	4-15
4.3.1.8.	Determine the internal node for the salary attribute with middle value.....	4-17
4.3.1.9.	Determining the internal node on salary attribute with middle value and marital status with married value	4-20
4.3.1.10.	Determine the leaf node for salary attribute with middle value, marital status attribute with married value and age attribute with young value.....	4-23
4.3.1.11.	Determining the leaf node on the attribute of other installments on the salary attribute with middle value, marital status attribute with married value and age attribute with old value.	4-23
4.3.1.12.	Determining the internal node on attribute salary with middle value and marital status attribute with single value	4-24
4.3.1.13.	Determining the internal node on salary attribute with high value	4-27
4.3.1.14.	Determining the internal node for salary attribute with high value and age attribute with young value	4-30

4.3.1.15. Determining the entropy value of salary attribute with high value, age attribute with young value and other installments attribute with yes value	4-32
4.3.1.16. Determining the entropy value of salary attribute with high value, age attribute with young value and other installments attribute with no value	4-33
4.3.1.17. Determining the entropy value of salary attribute with high value and age attribute with old value	4-34
4.3.1.18. Simplification of leaf nodes on the salary attribute high value...	4-34
4.3.2. Results Calculation Method Implementation with Naive Bayes	4-35
4.3.3. Testing and Analysis with Weka Software	4-37
4.3.4. Results Comparison of Methods C4.5 with Naive Bayes Method.....	4-50
4.3.5. Evaluation of Data Testing.....	4-50
4.3.6. Results Comparison of Methods C4.5 with Naive Bayes Method.....	4-54
CHAPTER 5 CONCLUSION AND SUGGESTION.....	5-1
5.1. Conclusion.....	5-1
5.2. Suggestion	5-2
REFERENCES.....	A
APPENDIX.....	C
Data Set	D
