DAFTAR GAMBAR

Gambar 2.1 Persamaan Kontinuitas pada Pipa Bercabang ........................................... II-10
Gambar 2.2 Diagram Moody .......................................................................................... II-12
Gambar 2.3 Perbesaran penampang............................................................................ II-13
Gambar 2.4 Koefisien K untuk Pengecilan Berangsur-angsur .................................. II-14
Gambar 2.5 Koefisien K untuk Inlet Pipa ................................................................. II-14
Gambar 2.6 pipa dengan sudut pendek ...................................................................... II-15
Gambar 2.7 pipa dengan sudut panjang ...................................................................... II-15
Gambar 3.1 Diagram alir Penelitian................................................................. III-2
Gambar 3.2 Lokasi Penelitian .................................................................................... III-3
Gambar 4.1 Gambar pompa 1 head 150 m ................................................................. IV-4
Gambar 4.2 Gambar pompa 2 head 125 m ................................................................. IV-4
Gambar 4.4 Gambar Instalasi Pipa Air Bersih Komplek Mutiara Garuda ............. IV-10
Gambar 4.5. Koefisien Aksesories ......................................................................... IV-15
Gambar 4.6. Gambar nilai kehilangan tinggi tekan mayor dan minor............... IV-15
