2.1.11 Value Stream Mapping ................................................................. 29
2.1.12 Value Added (VA) dan Non Value Added (NVA) ......................... 32
2.1.13 Parameter Pengukuran dalam Value Stream Mapping .................. 36
2.1.14 Current State Map ................................................................. 37
2.1.15 Future State Map ................................................................... 43
2.1.16 Takt Time .............................................................................. 44
2.1.17 Line Balancing ....................................................................... 45
2.1.18 Operation Process Chart .......................................................... 51
2.2 Penelitian Terdahulu .................................................................... 52
2.3 Kerangka Pemikiran ..................................................................... 56
BAB III METODOLOGI ................................................................. 57
3.1 Jenis dan Desain Penelitian ........................................................... 57
3.2 Data dan Informasi ....................................................................... 57
3.3 Teknik Pengumpulan Data ............................................................. 60
3.4 Populasi dan Sampel .................................................................... 60
3.5 Teknik Analisis Data .................................................................... 61
3.6 Langkah-langkah penelitian .......................................................... 62
BAB IV DATA DAN ANALISIS ..................................................... 67
4.1 Pengumpulan Data ....................................................................... 67
4.1.1 Sejarah profil perusahaan ......................................................... 67
4.1.2 Proses produksi ....................................................................... 68
4.1.3 Layout produksi ................................................................. 69
4.1.4 Waktu dan pembagian kerja .................................................... 69
4.1.5 Data produksi .......................................................................... 70
4.1.6 Data waktu setiap aktivitas ..................................................... 70
4.1.6.1 Takt time ........................................................................... 70
4.2 Pengolahan data ........................................................................... 83
4.3 Analisa pemecahan masalah ......................................................... 87
BAB V PEMBAHASAN .................................................................. 101
5.1 Temuan utama .......................................................................... 101
5.2 Perbandingan dengan studi terdahulu ......................................... 107
5.3 Implikasi industri ....................................................................... 108
5.4 Keterbatasan penelitian ................................................................. 109
BAB VI KESIMPULAN DAN SARAN ................................................. 110
6.1 Kesimpulan ................................................................................ 110
6.2 Saran .......................................................................................... 111
