DAFTAR ISI

KATA PENGANTAR ........................................................................................................... i

DAFTAR ISI .................................................................................................................. ii

DAFTAR TABEL ............................................................................................................. v

DAFTAR GAMBAR ..................................................................................................... vii

BAB I PENDAHULUAN ......................................................................................... I-1

1.1 Latar Belakang ...................................................................................................... I-1

1.2 Identifikasi Masalah .......................................................................................... I-3

1.3 Perumusan Masalah ........................................................................................ I-3

1.4 Maksud dan Tujuan Penelitian ....................................................................... I-4

1.5 Manfaat Penelitian .......................................................................................... I-4

1.6 Pembatasan dan ruang lingkup masalah ...................................................... I-5

1.7 Sistematika Penulisan ..................................................................................... I-5

BAB II TINJAUAN PUSTAKA .......................................................................... II-1

2.1 Atap ....................................................................................................................... II-1

2.2 Pelapis pelindung beton ................................................................................ I-2

2.2.1 Jenis-jenis pelapis pelindung beton .......................................................... II-2

2.3 Waterproofing Dak Konvensional .................................................................. II-3

2.4 Waterproofing Dak Penetron ........................................................................ II-4
2.5 Manajemen Mutu Proyek ................................................................. II-4
2.6 Manajemen Biaya Proyek ................................................................. II-5
2.7 Penelitian Terdahulu ........................................................................ II-6
2.8 Research GAP ................................................................................... II-11
2.9 Kerangka Berfikir ............................................................................. II-14

BAB III METODOLOGI PENELITIAN ...................................................... III-1

3.1 Metode Penelitian ............................................................................ III-1
3.2 Tempat dan waktu penelitian ............................................................. III-6
3.3 Instrumen Penelitian ......................................................................... III-7
  3.3.1 Data Primer ................................................................................ III-7
  3.3.2 Data Sekunder ............................................................................. III-8
3.4 Jadwal Penyusunan Tugas Akhir ....................................................... III-8

BAB IV HASIL DAN ANALISIS ............................................................... IV-1

4.1 Objek Penelitian ............................................................................... IV-1
4.2 Gambar Kerja .................................................................................... IV-2
4.3 Metode Pelaksanaan Waterproofing Dak .......................................... IV-4
4.4 Hasil Perbandingan Metode ............................................................... IV-8
4.5 Perhitungan Volume Pekerjaan ........................................................ IV-8
4.6 Analisis Perbandingan Biaya Waterproofing Dak Konvensional (Sika) dan Waterproofing dak Penetron ...................................................... IV-8

http://digilib.mercubuana.ac.id/
4.6.1 Analisis Perbandingan Biaya Pekerjaan Waterproofing Dak Konvensional (Sika) ............................................................................................... IV-9

4.6.2 Analisis Perbandingan Biaya Pekerjaan Waterproofing Dak Penetron .................................................................................................... IV-11

4.7 Rekapitulasi Harga dan Perbandingan ........................................................ IV-14

4.8 Hasil Analisis Biaya Waterproofing Dak Konvensional dan Waterproofing Dak Penetron ........................................................................................................... IV-15

4.9 Analisa Perbandingan Mutu Pekerjaan Waterproofing Dak Konvensional (Sika) dan Waterproofing Dak Penetron ........................................................................................................... IV-17

4.9.1 Analisis Perbandingan Mutu Waterproofing Dak Konvensional (Sika) IV-17

4.9.2 Analisis Perbandingan Mutu Waterproofing Dak Penetron ............... IV-20

4.9.3 Hasil Analisis Mutu Waterproofing Dak Konvensional (Sika) dan Waterproofing Penetron .................................................................. IV-22

BAB V PENUTUP ............................................................................................. V-1

5.1 Simpulan ........................................................................................................ V-1

5.2 Saran .............................................................................................................. V-2
