

## ABSTRACT

The country has plenty of freshwater fish. According to the CTF or the Ministry of Maritime Affairs and Fisheries, there are more than 1,000 species of freshwater fish are traded globally. Of that amount, our country has 400 species. However, only about 90 species are cultivated society. Freshwater fish easier than the farmed marine fish. The technology is simple and inexpensive process so a lot done in a home-based business. Unlike the sea water ornamental fish which require capital-intensive facilities. Ornamental fish is a prayer One fishery commodities Yang has a Major Role For Economic And MORE profitable Also ornamental fish . Ornamental fish consists From Operating prayer Namely , commodity marine ornamental fish and freshwater fish . Freshwater fish and seawater increasingly Many enthused by society that demands more ornamental fish Country INCREASED Good in the Local Market As international markets. Support the process of this activity, it is required that information systems can help as well as make it easier for the community to reintegrate. This information system is a system that makes it easy for people to interact. the community will be facilitated in their use, because the system will be integrated with android devices. This application is created by using the system application from eclipse that supports ADT (Android Development Tool), is a plugin that connects the IDE eclipse and the Android SDK.

Keywords: android Applications, Eclipse, Freshwater Ornamental Fish.
