BAB I PENDAHULUAN ........................................................................................................... 1
  1.1 Latar Belakang ................................................................................................................. 1
  1.2 Rumusan Masalah ............................................................................................................ 2
  1.3 Batasan Masalah ............................................................................................................... 2
  1.4 Tujuan Penelitian .......................................................................................................... 3
  1.5 Metode Penelitian ......................................................................................................... 3
  1.6 Sistematika Penulisan .................................................................................................... 4

BAB II LANDASAN TEORI .................................................................................................... 6
  2.1 Literature Review .......................................................................................................... 6
  2.2 Arduino Uno .................................................................................................................... 8
  2.3 Sensor MQ-5 ................................................................................................................. 12
  2.4 Kipas Angin (Fan) ........................................................................................................ 13
  2.5 Relay ................................................................................................................................ 14
  2.6 Rumus perhitungan ....................................................................................................... 15
    2.6.1 Rumus debit .............................................................................................................. 15

BAB III PERANCANGAN SISTEM ......................................................................................... 16
  3.1 Metodologi Perancangan ............................................................................................... 16
  3.2 Komponen Penelitian .................................................................................................... 17
  3.3 Perancangan Alat ........................................................................................................... 17
    3.3.1 Perancangan Perangkat Keras ................................................................................... 19
    3.3.2 Perancangan Perangkat Lunak ................................................................................ 23

BAB IV HASIL DAN PEMBAHASAN ..................................................................................... 26

http://digilib.mercubuana.ac.id/
4.1. Pengujian Komponen

4.1.1. Pengujian Arduino Uno

4.1.2. Pengujian Sensor Gas MQ-5

4.1.3. Pengujian Exhause Fan (Kipas Angin)

4.1.4. Pengujian Sistem Elektrik

4.1.5. Pengujian Sistem Keseluruhan

4.2. Hasil Pengujian Sistem

4.2.1. Kalkulasi Aliran Pembuangan Udara

4.3. Pembahasan Hasil Pengujian Sistem

BAB V PENUTUP

5.1. Kesimpulan

5.2. Saran
