

## DAFTAR GAMBAR

Gambar 2.1. Prinsip clinching menggunakan alat-alat bulat	4
Gambar 2.2. Press brakes	6
Gambar 2.3. Handling units	6
Gambar 2.4. Universal press	7
Gambar 2.5. Specializaed units	7
Gambar 2.7. Die sets	8
Gambar 2.8. Special systems	8
Gambar 2.9. Process steps in single step clinching	9
Gambar 2.10. Process steps in multi step clinching	10
Gambar 2.11. Geometry of a clinched joint	10
Gambar 2.12. Comparison of properties of clinched and spot welded joints	11
Gambar 2.13. Process steps of a single clinching process without Local Incision	11
Gambar 2.14. Process steps of a single step clinched joint without local incision	12
Gambar 2.15. Formation of a flat clinch element	12
Gambar 2.16. Process steps of a multi steps clinched joint	13
Gambar 2.17. Comparison of clinch elements	13
Gambar 2.18. Holding and stripping systems for clinching	14
Gambar 2.19. Characteristic of differently designed spot welding machines	17
Gambar 4.1. Sampel pelat	22
Gambar 4.2. <i>Frame</i> dan Aktual <i>clinch</i> ing	23
Gambar 4.3. Posisi <i>clinch</i> ing pada part <i>Frame</i>	23
Gambar 4.4. Mesin press	24
Gambar 4.5. Mesin spot welding	25
Gambar 4.6. Keamanan mesin press NAGAO 110 Ton	26
Gambar 4.7. <i>Foot step</i> pada mesin Spot welding TOA SEIKI 380V	26
Gambar 4.8. Mesin uji tarik	27
Gambar 4.9. Display mesin uji tarik	27
Gambar 4.10. Label kalibrasi Mesin uji tarik	27
Gambar 4.11. Uji geser <i>Spot welding</i>	28

Gambar 4.12. Uji tarik <i>Spot welding</i>	28
Gambar 4.13. Uji geser <i>Clinching</i>	29
Gambar 4.14. Uji tarik <i>Clinching</i>	29
Gambar 4.15. Dimensi sampel Uji tarik <i>Spot welding</i> dan <i>Clinching</i>	32
Gambar 4.16. Dimensi sampel Uji geser <i>Spot welding</i> dan <i>Clinching</i>	32
