

ABSTRACT

This study aims to determine the relevance of the mechanism of Good Corporate Governance (GCG) and Leverage on Company Value in Transportation companies in 2014-2017. The object of this study is companies listed on the Indonesia Stock Exchange which were published from 2014 to 2017. Samples were taken using purposive sampling, producing 108 samples. The data analysis technique used is descriptive quantitative by using multiple linear regression analysis with SPSS version 25.

The results of this study indicate that the Managerial Ownership (MOWN) variable influences the Price to Book Value (PBV). The variable Institutional Ownership (INST), Independent Board of Commissioners (IC) and Leverage have no effect on Price to Book Value (PBV).

The number of case determinations (adjusted R²) is 25.8% which means that the Price to Book Value (PBV) of 25.8% is determined by the variable Managerial Ownership (MOWN), Institutional Ownership (INST), Independent Board of Commissioners and Leverage (DER). While the remaining 74.2% is explained or influenced by other factors outside the model.
