

DAFTAR GAMBAR

Gambar 2.1.	<i>Cooling tower</i> (sumber kejuruan listrik blogspot)	8
Gambar 2.2.	Proses pendinginan air dengan <i>cooling tower</i> (sumber kejuruan listrik blogspot)	9
Gambar 2.3.	<i>Cooling tower forced draft</i> (sumber ruang server.com)	9
Gambar 2.4.	<i>Cooling Tower induced draft</i> dengan aliran berlawanan (sumber ruang server.com)	10
Gambar 2.5.	<i>Cooling Tower induced draft</i> dengan aliran melintang (sumber ruang server.com)	10
Gambar 2.6.	Diagram Alir <i>Cooling Water System</i>	12
Gambar 2.7.	Blok Diagram PLC (sumber automation forum)	16
Gambar 2.8.	Transistor tipe NPN (sumber panasonic web)	20
Gambar 2.9.	Transistor tipe PNP (sumber panasonic web)	20
Gambar 2.10.	Teknologi Layar Sentuh (sumber ruang server.com)	22
Gambar 2.11.	PLC Konfigurasi tipe AFPX-C30R (sumber panasonic web)	22
Gambar 2.12.	Inverter Hitachi	25
Gambar 2.13.	MCB 3 Pole dan 4 Pole (sumber schneider web)	27
Gambar 2.14.	<i>Magnetic contactor</i> (sumber schneider web)	28
Gambar 2.15.	Relay 2 contac (sumber www.ebay.com)	29
Gambar 2.16.	<i>Thermocouple</i> (sumber automation forum)	30
Gambar 2.17.	<i>Thermocouple</i> (sumber automation forum)	31
Gambar 2.18.	<i>Pressure Tranmitter</i> (sumber www.instrumart.com)	33
Gambar.2.19.	<i>Buzzer</i> (sumber automation.com)	34
Gambar 3.1.	<i>Flowchart</i> Metode Penelitian	38
Gambar 3.2.	<i>Blok Diagram System Cooling Tower</i>	39
Gambar 3.3.	Perhitungan MCB (sumber modul teknik instalasi dan audit energi. Ir. Sulistyono.MM)	43
Gambar 3.4.	Ukuran kabel (sumber modul teknik instalasi dan audit energi. Ir. Sulistyono.MM)	43
Gambar 3.5.	Tabel ukuran kabel (sumber modul teknik instalasi dan	

audit energi. Ir. Sulistyono.MM)	44
Gambar 3.6. <i>Arsitecture Cooling Tower</i>	46
Gambar 3.7. <i>Flowchart perancangan panel automatic cooling tower</i>	48
Gambar 3.8. <i>Flowchart blower dan circulation pump</i>	50
Gambar 3.9. <i>Flowchart supply pump</i>	52
Gambar 3.10. Unit PLC panasonic tipe AFPX-C30R	54
Gambar 3.11. <i>Layout terminal PLC panasonic tipe AFPX-C30R</i>	55
Gambar 3.12. <i>Layout expansion unit PLC panasonic tipe AFPX-C30R</i>	56
Gambar 3.13. <i>Expansion unit PLC panasonic tipe AFPX-C30R</i>	57
Gambar 3.14. Contoh rangkaian <i>ladder diagram</i>	58
Gambar 3.15. Komponen pemrograman (sumber Panasonic web)	59
Gambar 3.16. <i>Software Panasonic FPWIN GR</i>	59
Gambar 3.17. Ladder Diagram <i>Input dan Output</i>	60
Gambar 3.18. Ladder Diagram <i>Internal Relay</i>	61
Gambar 3.19. <i>Ladder Diagram Timer</i>	62
Gambar 3.20. <i>Ladder Diagram Data Register</i>	62
Gambar 3.21. Program PLC Motor <i>Blower</i>	63
Gambar 3.22. <i>Wiring Selector Switch Posisi Auto</i>	64
Gambar 3.23. <i>Trigger Relay Auto</i>	64
Gambar 3.24. <i>Start relay & contactor motor blower</i>	65
Gambar 3.25. <i>Inverter Blower Running</i>	65
Gambar 3.26. Program PLC Motor Sirkulasi <i>Pump</i>	65
Gambar 3.27. <i>Start relay & contactor motor sirkulasi pump</i>	66
Gambar 3.28. Program PLC <i>Contactor Supply Pump</i>	67
Gambar 3.29. Program <i>Start Relay & contactor motor Supply Pump</i>	67
Gambar 3.30. <i>Start Relay & contactor motor Supply Pump</i>	68
Gambar 3.31. <i>Inverter Supply Pump Running</i>	68
Gambar 3.32. Program PLC <i>Inverter Alarm</i>	70
Gambar 3.33. <i>Wiring Diagram Inverter Alarm</i>	70
Gambar 3.34. Program PLC Motor <i>Blower</i>	71
Gambar 3.35. <i>Wiring Diagram Motor Blower</i>	72

Gambar 3.36. <i>Wiring Diagram Motor Blower</i>	72
Gambar 3.37. Program P LC Motor Sirkulasi	73
Gambar 3.38. <i>Wiring Diagram Motor Sirkulasi</i>	73
Gambar 3.39. Program PLC Motor <i>Supply</i>	74
Gambar 3.40. <i>Wiring Diagram Motor Supply</i>	74
Gambar 3.41. Panel <i>Automatic Cooling Tower</i> Tampak Depan	75
Gambar 3.42. <i>Panel Automatic Cooling Tower</i> Tampak Dalam	75
Gambar 4.1. <i>Measure value dan set value temperature</i> (tabel no 1)	79
Gambar 4.2. <i>Measure value dan set value temperature,</i> status motor <i>running</i> (tabel no 2)	79
Gambar 4.3. <i>Measure value dan set value temperature</i> (tabel no 3)	79
Gambar 4.4. <i>Measure value dan set value pressure</i> (tabel no 1)	80
Gambar 4.5. <i>Measure value dan set value pressure,</i> status motor <i>running</i> (tabel no 2)	80
Gambar 4.6. <i>Schedule operation 1</i> , mesin <i>cooling tower</i> pada layar HMI	82
Gambar 4.7. <i>Schedule operation 2</i> , mesin <i>cooling tower</i> pada layar HMI	82
Gambar 4.8. Waktu pengujian <i>schedule operation</i> , mesin <i>cooling tower</i>	83
Gambar 4.9. Nilai <i>temperature</i> dan <i>pressure</i> pada jam 14.43 dan status motor <i>off</i>	83
Gambar 4.10. Perbandingan Konsumsi Daya per hari dari Mesin <i>Cooling Tower</i>	88
Gambar 4.11. Perbandingan Konsumsi Daya per bulan dari Mesin <i>Cooling Tower</i>	89
Gambar 4.12. Tampilan Depan HMI	90
