

**THE RELATIONSHIP OF FATHER INVOLVEMENT WITH SOCIAL  
ADJUSTMENT IN SANTRIWATI AT-TAQWA NAGRAK ISLAMIC  
BOARDING SCHOOL**

**ABSTRACT**

Purpose of this research was to explain and test the relationship between variables in this study in female students at Islamic Boarding Schools. These variables were Father Involvement and Social Adjustment. The type of research used in this research was quantitative correlational. Respondents in this research were female students with age range 12-15 years of age. The total of respondents in this research was 145 respondents. This research was conducted on female students of At-taqwa Islamic Boarding School. The data retrieval technique used was probability sampling. Data were collected through two measuring tools, namely Father Involvement Scale (30 items) from Risnawati, Fihadinata, Wardani based on Gony theory (2018) and Social Adjustment (Schneiders) 21 items. The analysis technique used to test the hypothesis is Pearson Correlations. The results show that there is positive significant relationship between Father Involvement and Social Adjustment (0.490) on junior high school student of At-Taqwa Islamic Boarding School Nagrak.
