ABSTRACT

Image Capture is in charge of arranging the appropriate camera, then compiling a list of the required cameras, type of film, lens and lens filter, and other special equipment. In the process of taking pictures, the writer uses the camera technique. In this film the writer also combines elements of Shoot Size, Camera Angle, and Camera Movement, the technique of taking multi camera pictures is what the writer applies in the production of the film "Memodied". The use of two cameras at the same time in the production of this film, To support the shooting technique used, the author combines them with dynamic image composition using the Rule of Third composition so that the resulting image matches what we expect.

Pyscho drama genre film with the title "Memodied" which tells of a woman named Rini who had severe trauma as a child. Rini with her innocent character / stature wanted to change her fate and dark memory in childhood. Various methods have been done by Rini so that she can control her emotions when she remembers her past being so dark. The trauma was caused by Rini's parents being killed due to robbery.
