ABSTRACT

This study aims to determine whether the ratio of capital: gearing ratio. The ratio of financing receivables: financing to asset ratio. Receivable quality ratio: non-performing financing. And the efficiency ratio: BOPO affects the financial performance of finance companies (multi). The population of this study is all finance companies (multi) listed on the Indonesia Stock Exchange in 2015-2020 as many as 16 companies, with a total sample of 13 companies. The data analysis method used panel data regression with Model-Random Effect. The results of the study partially found that the Gearing ratio (GR) had no effect on Return On Assets (ROA) as a proxy for the company's financial performance, while Financing to assets ratio (FAR) had a positive effect on Return On Assets (ROA). Non-Performing Financing (NPF) and Operating Expenses (BOPO), has a negative effect on Return On Assets (ROA). The results of the study simultaneously found that the Gearing ratio (GR), Financing to assets ratio (FAR), Non-Performing Financing (NPF), and Operating Expenses (BOPO) had an effect on Return On Assets (ROA).

Keywords: Financial performance: Return On Assets (ROA), the Gearing ratio (GR), Financing to assets ratio (FAR), Non-Performing Financing (NPF), and Operating Expenses (BOPO)
