DUAL DEGREE PROGRAM

ELECTRICAL ENGINEERING – COMPUTER SCIENCE AND TECHNOLOGY

UNIVERSITAS MERCU BUANA – BEIJING INSTITUTE OF TECHNOLOGY

JAKARTA – BEIJING

2016

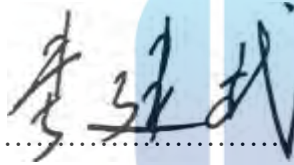

Declaration

I hereby enunciate that the work in this thesis report is my own except for citations that have been duly acknowledged.

Student: ABDUROHMAN

Date: 23 July 2016

BIT Supervisor :

.....
ASSOCIATE PROFESSOR CHENG CHENG

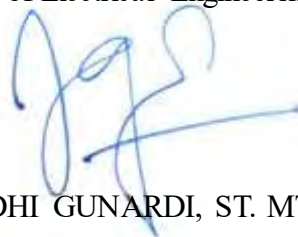

Mercu Buana University Supervisor :

Approved by,
Head of Electrical Engineering

YUDHI GUNARDI, ST. MT.

Acknowledgments

Firstly, I am grateful to the God for the good health and well being that were surely necessary to complete this thesis. I wish to express my sincere thanks to Principal of the Faculty, for providing me with all the necessary facilities for the research. I am also grateful to all lecturers, in the Department of Computer Science and Technology of Beijing Institute of Technology. I am thankful to them for sharing expertise, and sincere and valuable guidance and encouragement extended to me.

The complete thesis is inseparable from the supervisor's ride into the teacher's careful guidance and cultivation, including the entire research process at all stages of guidance, encouragement setbacks when countless times to explore, study road difficult problems. Here, heartfelt thanks to the way the teacher.

At the same time, be grateful to learn together in a laboratory. Our work is inextricably linked and mutually reinforcing, two and a half to work together so we all learned a lot, also left unforgettable memories. In addition, a solid foundation thanks laboratory sessions throughout the senior sister advancing research projects lay, so this research can be carried out smoothly. Finally, I sincerely thank my parents for understanding and support for this study.

Author

Table of Contents

Declaration	i
Acknowledgments	ii
Abstract	iii
Table of Contents	iv
1. Introduction	1
1.1 Background.....	2
1.1.1 3Ds Max for 3D Modeling.....	3
1.1.2 Cal 3d ‘Skeletal based 3D’	3
1.1.3 Microsoft Visual C++ and Open Inventor.....	4
1.1.4 Software Bug.....	5
1.2 Purpose and Significance.....	5
1.3 The Main Thesis Work.....	6
2. Global Structure of Virtual Hand System	7
2.1 System Summary.....	7
2.1.1 Virtual Hand Sensing System Implementation Framework.....	7
2.2 System Analysis.....	8
2.2.1 Virtual Hand System User.....	8
2.2.2 3D Motion ControllersAs An Input Device.....	9
2.2.3 System Functional Requirements.....	11
2.2.4 System Non-functional Requirements.....	15
2.3 Outline Design of System Development Process.....	16
2.3.1 3D Hand Modeling.....	16
2.3.2 Cal3D open source as C++ Library.....	17
2.3.3 3-D scene rendering.....	17
3. Virtual Hand Modeling	19
3.1 Mesh Creation.....	21
3.2 Skeleton System and skin texturing.....	21
3.3 Animating.....	23
4. Virtual Hand System Investigation Implementation	29
4.1 System Implementation.....	29

4.1.1 Scene.....	29
4.1.2 Parts List.....	29
4.2 System Investigation Case.....	30
4.2.1 Object System Investigation.....	30
4.2.2 Investigation Case Form.....	30
4.4.2 Virtual Hand Investigation Bugs Captured.....	31
4.4.3 Complete Virtual Hand System Investigation Results.....	43
4.3 Bugs Caught Summary.....	53
4.3.1 Imperfect Collision Problem Bugs.....	53
4.3.2 Incorrect Hand Gesture Bugs.....	54
4.3.3 Flawed Hand Motion while Grasping.....	54
5. In Conclusion.....	56
References.....	57
