ABSTRACT

The purpose of this study is to determine the impact of the current ratio, debt to equity ratio, net profit margin, and earnings per share on share price in sub-sector manufacturing companies that manufacture cosmetics and household goods and are listed on the Indonesia Stock Exchange from 2014 to 2019. There are 6 samples of cosmetics and cosmetics sub-sector companies' households used in this research. This research was done by using the statistical analysis method and descriptive function to describe the object under study through the variable independent of the dependent variable. The author also uses the Eviews tool (v10) to help process the data. According to research using the t-statistical test, the current ratio has no significant effect on stock prices; debt to equity ratio also has no significant effect on stock prices; net profit margin also has no significant effect on share price; and earnings per share has a significant effect on share price.
