

ABSTRACT

This study aims to empirically prove the influence of the Audit Committee, Corporate Social Responsibility Disclosure (CSRD), Leverage and Capital Intensity on Tax Aggressiveness. This research was conducted on various industrial sub-sector manufacturing companies listed on the Indonesia Stock Exchange, using multiple linear regression analysis techniques.

The results showed that the audit committee, leverage and capital intensity had an effect on tax aggressiveness. Meanwhile, Corporate Social Responsibility Disclosure has no significant effect on tax aggressiveness.

Keyword : Audit Committee, Corporate Social Responsibility Disclosure, Leverage, Capital Intensity and Tax Aggressiveness
