

ABSTRACT

This study aimed to analize the effect of product quality, perceived price, and promotion on purchase decision and the implications on customer loyalty. This research was descriptive quantitative. Both primary and secondary data were gathered. Secondary data were gathered from various sources such as journals, books and other related publications. Primary data were obtained using survey questionnaire which were distributed to the target respondents of customer investor magazine. Using purposive sampling technique, a total of 80 respondens were two stage path analysi. Path analysis was employed in this study. In the first stage, the results showed that both individually and simultaneously product quality, price, and promotion had positive and significant influence on purchase decision. Perceived price was found to have the highest influence on purchase decision. Similarly in the second stage, it was found that showed that both individually and simultaneously product quality, perceived price, and promotion had significant influence on customer loyalty. Promotion was found to have the highest influence on customer loyalty. It is suggested that in order to keep customer satisfied and loyal, firms should constantly improve product quality, perceived price, and promotion. In future research it is advised to include other variables such as: trust, corporate image, customer value, etc

Keywords: product quality, price, and promotion, purchase decision, and customer loyalty
