

ABSTRAKSI

Sekolah merupakan salah satu bentuk dari organisasi yang di dalamnya terdapat kegiatan belajar mengajar yang berada di bawah tanggung jawab seorang Kepala Sekolah. Segala kegiatan yang berlangsung di sekolah tidak bisa dimonitoring secara keseluruhan.

Pada Sekolah MTS. Manbaul Khair Ciledug setiap transaksi penerimaan siswa baru yang ada masih tercatat secara manual, hal ini yang menyebabkan petugas penerimaan siswa baru mengalami kesulitan menjalankan proses transaksi sehari-hari yang kadang membutuhkan informasi secara cepat dan akurat, serta kesulitan dalam hal pemeliharaan data yang ada yang mudah rusak dimakan waktu. Dan para wali murid sangat sulit untuk mengetahui mengenai perkembangan Nilai dan Pembayaran siswa.

Untuk mengatasi permasalahan diatas, maka perlu website yang didukung PHP mySQL dalam penyajian Informasi sekolah yang meliputi penyajian Data Siswa, Nilai siswa dan Spp siswa. Data yang dapat diakses oleh *user* berupa informasi data siswa, nilai dan spp. Hasil kegiatan berupa *website* yang siap di *upload* ke internet sehingga hasilnya siswa dapat dengan mudah mengakses data tetapi siswa tidak dapat mengupdate data kecuali administrator.

Kata Kunci : Website, Sekolah dan MTS. Manba'ul Khair.

ABSTRACT

The school was one of the forms from the organisation that inside was received by the studying activity taught that was under responsibility of a Principal. All the activities that took place in the school could not dimonitoring on the whole.

To the MTS. Manbaul Khair Ciledug School of each acceptance transaction of the new student available still was recorded manually, this that caused the official of acceptance of the student just experienced the difficulty of undertaking the process of the everyday transaction that sometimes needs information quickly and accurately, as well as the difficulty in the matter of the maintenance of the available data that was easy broken with time. And the guardians of the pupil really had difficulty to know concerning the development the Value and the student's Payment.

To overcome the problem above, then necessary website that was supported by PHP mySQL in the presentation of school Information that covered the presentation of the Student's Data, the Value and Spp of the student the student. The data that could be accessed by the user took the form of information of the student's data, thought and spp. Results of the activity take the form of website that was ready in upload to the internet so as results of the student were able easily to access the data but the student could not mengupdate the data except the administrator.
