ABSTRACT

Racing games have an atmosphere of freedom in driving where users or so-called players can drive freely without obstacles using their favorite vehicle to freely drive in the game without any speed limits. Racing games have their own uniqueness and challenges where the uniqueness and challenges of racing games are different, racing games also have different sitting positions, for example F1 has a sitting position that is slightly lower and straight legs down, super gt racing with straight spine and legs straight, and rally racing cars whose sitting position is upright leaning against the seat, as well as trucks with an upright position accompanied by a steering wheel position under the seat.

Keywords: Multiposition gaming chair, Various sitting positions, Adjustable gaming chair.
