This study uses FP-Growth algorithm to analyze the preferences and trends of anime viewers on Myanimelist.net. The analysis found that 'Edit Opening Theme' is the most frequently occurring itemset in the dataset, with support 0.144444, followed by 'Theme: School' with support 0.111111, and 'Themes: Gore, Military, Survival' with support 0.066666. These findings provide insight into the anime themes that are most popular among the platform's audience. In addition, this research has the potential to provide anime recommendations that match users' preferences, improve the platform's recommendation features, and support the development and marketing of new anime titles that match fans' interests. As such, this research provides practical benefits to the anime industry and fans, as well as providing a deeper understanding of anime audience trends on Myanimelist.net.
