

***CORRELATION BETWEEN SPIRITUAL INTELLIGENCE AND MARITAL SATISFACTION WITHIN HUSBAND AND WIFE IN DHAYA PESONA RESIDENCE***

***Rachmi Utami***

***ABSTRACT***

*The aim of this study is to examine the correlation between spritual intelligence with marital satisfaction within husband and wife in Dhaya Pesona Residence. Data collecting method that used in this research is purposive sampling with 50 husbands and 50 wives. Data were taken by using Integrated Spritual Intelligence Scale (ISIS) quisioner which translated by Yosi Amran and Christophor Dryer (2008) and Dyadic Adjtmnt Scale (DAS), which is adapted from Safitri (2011) that analyzed using product moment correlation from Pearson. Reliability score for spritual intelligence scale is 0,909 dan for marital satisfaction scale is 0,788. According to the study's result and data analyze, the value of correlation is 0,383. This result shows that there is positive correlation between spritual intelligence and marital satisfaction. Furthermore, it also means that higher spritual intelligence husband and wife had, as well as theirs marital satisfaction. In other hand, the lower spritual intelligence' s level do husband and wife had, as well as it's marital satisfaction.*

*keywords: spritual intellegence, marital satisfaction*

# HUBUNGAN ANTARA KECERDASAN SPIRITUAL DAN KEPUASAN PERNIKAHAN PADA SUAMI DAN ISTRI DI PERUMAHAN DHAYA PESONA

Rachmi Utami

## ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara kecerdasan *spiritual* dengan kepuasan pernikahan pada suami dan istri di Perumahan Dhaya Pesona. Metode pengumpulan data yang digunakan adalah *purposive sampling* dengan sampel berjumlah 50 suami dan 50 istri. Data dikumpulkan dengan menggunakan kuesioner *Integrated Spiritual Intelligence Scale* (ISIS) terjemahan Yosi Amram dan Christhoper Dryer (2008) dan *Dyadic Adjustment Scale* (DAS) adaptasi dari Safitri (2011) dan diolah menggunakan analisis korelasi *product moment* dari *Pearson*. Nilai reliabilitas skala kecerdasan *spiritual* adalah 0,909 dan reliabilitas skala *kepuasan pernikahan* adalah 0,788. Berdasarkan hasil penelitian dan hasil analisis data diperoleh koefisien korelasi sebesar 0,383. Hasil ini menunjukkan bahwa ada hubungan yang positif antara kecerdasan *spiritual* dengan kepuasan pernikahan. Artinya semakin tinggi tingkat kecerdasan *spiritual* maka semakin tinggi tingkat kepuasan pernikahan yang dimiliki suami dan istri. Sebaliknya, semakin rendah tingkat kecerdasan *spiritual* maka semakin rendah *kepuasan pernikahan* yang dimiliki suami dan istri.

**Kata kunci:** kecerdasan spiritual, kepuasan pernikahan.
