ABSTRAK

Penelitian ini bertujuan menganalisis pengaruh dari *economic value added*, *market value added*, *operating income* dan arus kas operasi terhadap *return* saham. Penelitian ini juga bertujuan untuk mengetahui tolak ukur mana yang mempunyai pengaruh paling signifikan terhadap *return* saham.

Penelitian ini merupakan penelitian eksplanatif asosiatif yang variabelnya bersifat kasualitas. Sampel dalam penelitian ini adalah perusahaan yang masuk dalam Indeks LQ45 yang dilihat dengan metode *purposive sampling*. Data yang digunakan bersifat *time series*, dan diambil dari laporan keuangan tahunan perusahaan 2009-2011. Pengujian hipotesis dilakukan dengan metode statistik melalui analisis regresi berganda dengan program SPSS 22.

Hasil penelitian menunjukkan bahwa *market value added* dan arus kas operasi berpengaruh signifikan terhadap *return* saham, sedangkan *economic value added* dan *operating income* tidak berpengaruh signifikan terhadap *return* saham. Korelasi *economic value added* terhadap *return* saham lebih besar dibanding variabel independen lainnya.

Kata Kunci: *return saham, economic value added, market value added, operating income, arus kas operasi.*
