ACKNOWLEDGMENT

Praise Alhamdulillah writer said to Allah for blessing, grace and guidance of Him, preparation of the thesis entitled “Automatic Temperature Controlled Using Arduino and Smartphone” that’s one the requirements for completing the study Bachelor Program at the School Of Computer Science and Engineering, Beijing Institute of Technology can be resolved properly.

The author realizes that this final report is far from perfect. Therefore, criticism and suggestions will always be the author is welcome. With all the limitations, the authors recognize also that this final report will not be realized without the support, guidance, and encouragement from various parties. Therefore, with all humility. Author express gratitude to:

1. Mr. Akhmad Wahyu Dani, S.T., M.T as the final project supervisor who never tire of giving suggestion and motivation for this project
2. Parents, brothers and sister beloved who always support, pray and devote all their love the author.
