This Thesis Report is submitted by:

ID Student : 41519010198
Name : Yoseph Martin Lay
Study Program : Informatics Engineering
Thesis Report Title : Applications For Learning Fruits And Animals Using
Android-Based Augmented Reality Technology

Has been successfully defended at a the hearing before the Board of Examiners and accepted as part of the requirements needed to obtain a Bachelor's degree in the Informatics Engineering Study Program, Faculty of Computer Science, Mercu Buana University.

Endorsed by:

Supervisor : Ir. Emil Robert Kaburuan, Ph.D., IPM., ASEAN Eng ()
NIDN : 0429058004
Chief Examiner : Dr. Afiyati, S.Si., M.T. ()
NIDN : 0316106908
Examiner 1 : Dr. Hadi Santoso, S.Kom., M.Kom ()
NIDN : 0225067701

FOREWORD

Praise and gratitude to the presence of God Almighty who has given His grace and guidance, so I can do this final report to complete my Bachelor of Informatics Engineering in Mercu Buana University. The author is fully aware that in making this Final Report it cannot be completed without any support, therefore I would like to express my deepest gratitude to:

1. Ir. Emil Robert Kaburuan, S.T., M.A., Ph.D, as Thesis Supervisor, which he always support and never tired to push the author until this thesis finished.
2. Dr. Bambang Jokonowo, S.Si.,MTI. as Dean of Faculty of Computer Science, Universitas Mercu Buana.
3. Dr. Hadi Santoso, S.Kom., M.Kom, as Head of Department of Informatics Engineering, Universitas Mercu Buana.
4. Afiyati, Dr., S.Si, MT, as Secretary of International Department of Informatics Engineering, Universitas Mercu Buana.
5. Prastika Indriyanti S.Kom, M.Cs as Academic Supervisor.
6. All Lecturers have been dedicated to transferring they knowledge.
7. Both parents my father and my mother always provide prayers, advice and support to author.
8. My girlfriend always giving help in any situation
9. Also My Informatics Engineering Friends who have always been together since the first time starting college at Universitas Mercu Buana.

The author realizes that there are still many shortcomings in this report. Therefore,constructive feedback is allowed and I hope this report will be of usefull to other All Mercu Buana University students and also other students one day.

Jakarta, 20 June 2024

Yoseph Martin Lay

APPROVAL STATEMENT PAGE

As an academic member of Mercu Buana University, I, the undersigned :

Name : Yoseph Martin Lay
ID Student : 41519010198
Study Program : Informatics Engineering
Thesis Report Title : Applications For Learning Fruits And Animals Using
Android-Based Augmented Reality Technology

For the sake of scientific development, I hereby give permission and agree to give University Mercu Buana a **Non-Exclusive Royalty-Free Right** for my scientific work entitled above along with existing tools (if needed).

With this Non-Exclusive Royalty-Free Right, Universitas Mercu Buana has the right to store, transfer/format, manage in the form of a database, maintain, and publish my internship/Thesis/Fissertation Report as long as it still includes my name as the author/ the creator and as the copyright owner.

This statement I made on truth.

ABSTRAK

Nama : Yoseph Martin Lay
NIM : 41519010198
Program Studi : Informatics Engineering
Pembimbing : Emil Robert Kaburuan, S.T., M.A., Ph.D
Judul Tugas Akhir : Applications for Learning Fruits Using Android-
Based Augmented Reality Technology

Penggunaan teknologi Augmented Reality (AR) dalam dunia pendidikan menjadi salah satu bidang penelitian yang menarik perhatian dalam beberapa tahun terakhir. Dalam konteks pembelajaran hewan dan buah-buahan, AR berpotensi besar untuk meningkatkan minat dan pemahaman siswa melalui pengalaman interaktif yang menarik. Dengan menggunakan Unity 3D sebagai platform pengembangan dan Vuforia sebagai toolkit AR, aplikasi ini dilengkapi dengan fitur-fitur seperti pendeteksian objek, visualisasi buah dan hewan dalam 3D, serta informasi tambahan tentang nama, deskripsi dan informasi tambahan tentang sifat dan karakteristik. dari setiap objek. Penelitian ini bertujuan untuk mengembangkan aplikasi pembelajaran buah dan hewan dengan menggunakan teknologi Augmented Reality (AR) berbasis Android. Aplikasi ini memanfaatkan kemampuan AR pada perangkat Android untuk memvisualisasikan buah dan hewan secara tiga dimensi (3D) di dunia nyata.

ABSTRACT

Name : Yoseph Martin Lay
NIM : 41519010198
Study Program : Informatics Engineering
Counsellor : Emil Robert Kaburuan, S.T., M.A., Ph.D
Title Of Thesis Report : Applications for Learning Fruits Using Android-
Based Augmented Reality Technology

The use of Augmented Reality (AR) technology in education has become an area of research that has attracted attention in recent years. In the context of learning animals and fruits, AR has great potential to increase students' interest and understanding through interesting interactive experiences. By using Unity 3D as a development platform and Vuforia as an AR toolkit, this application is equipped with features such as object detection, visualization of fruits and animals in 3D, as well as additional information about names, descriptions and additional information about characteristics and characteristics of each object. This study aims to develop a fruits and animals learning application using Android-based Augmented Reality (AR) technology. This application takes advantage of AR capabilities on Android devices to visualize fruits and animals in three dimensions (3D) in the real world.
